Smart Food Redistribution Platform

Turning Food Waste into Opportunity

An AI-powered platform connecting restaurants with surplus food to charities in need — reducing waste, fighting hunger, and building a sustainable future.

THE PROBLEM

A Crisis Hidden in Plain Sight

Every day, restaurants discard perfectly edible food while millions go to bed hungry. This is not just an environmental issue — it is a systemic failure of distribution.

🌍 Environmental Cost

Food waste is a leading contributor to greenhouse gas emissions globally.

💸 Economic Loss

Restaurants lose thousands annually on discarded inventory and disposal fees.

🤝 Social Gap

Charities struggle to source consistent food donations despite high demand.

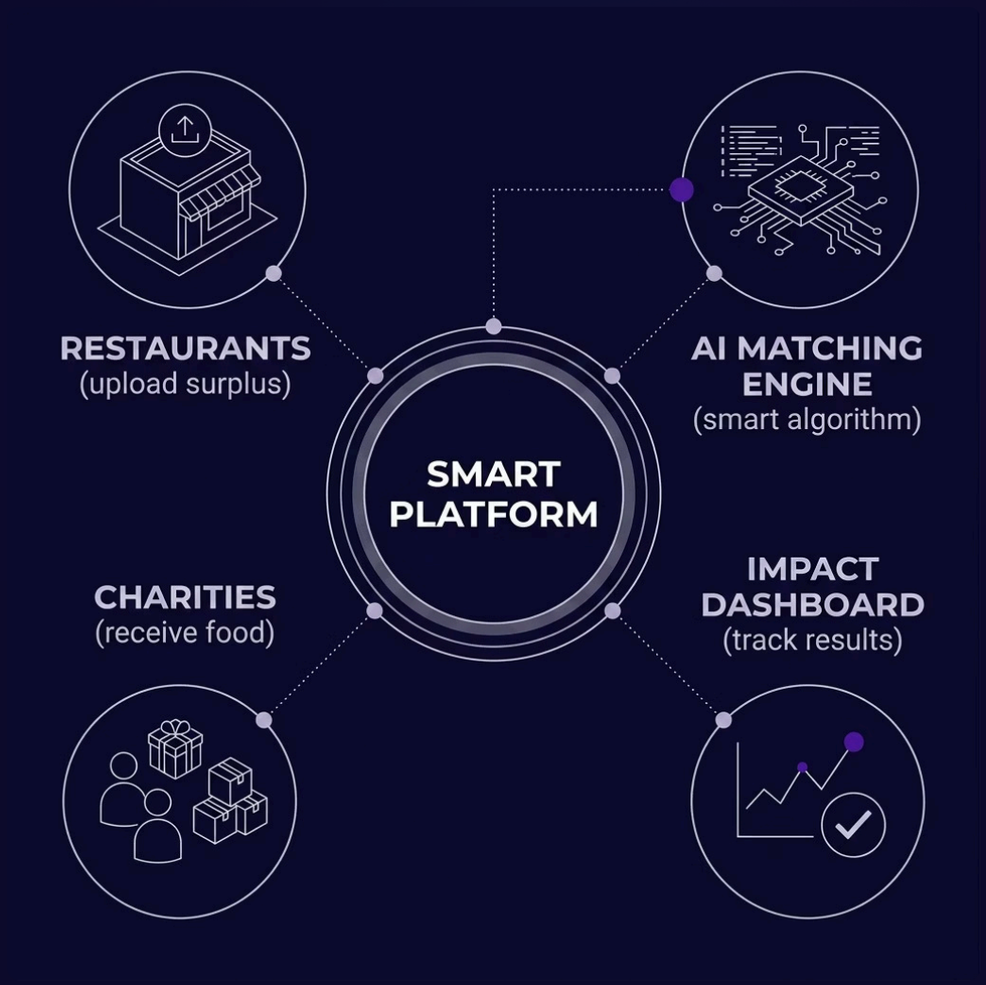
OUR SOLUTION

One Platform. Two Problems Solved.

Smart Food Redistribution Platform uses AI to instantly match restaurants with surplus food to the right charities — in real time, at zero friction.



→ Scalable

Designed to grow from local pilots to national networks.

→ Efficient

AI eliminates manual coordination and delays.

→ Sustainable

Creates a self-reinforcing cycle of giving and impact.
